DECEMBER - 2023

When we think of Christmas various thoughts emerges in our mind, namely Decorations, Gifts, Christmas cake, Food, Santa Claus, Snow and Winter Scenes, New dress, Music, Party, Joy, Togetherness, Goodwill etc. Beyond this festive cheer, the spiritual significance Christmas reveals profound messages of love, hope and redemption to the Earth.

Bro. Antony Raj CSC
Director

ECO-CHRISTMAS

This year, let our Christmas celebration not only be about the joy of Christ's birth but also about our responsibility as stewards of God's creation. In Genesis 2:15, a sacred responsibility is bestowed upon humanity: "The Lord God took the man and put him in the Garden of Eden to work it and take care of it." This divine commandment isn't merely an outdated rule but an enduring calling for us to be stewards of the Earth. It's a timeless trust passed down through generations, emphasizing our role in cultivating and responsibly managing the precious gift of the natural world.

AN ECO-FRIENDLY CHRISTMAS

Samaritan not to pass by but actively engage in healing the Earth. A great theologian Albert Schweitzer says: "Unless we care about all living things, we won't find peace." This reminds us that extending our compassion to nature is essential for our own well-being.

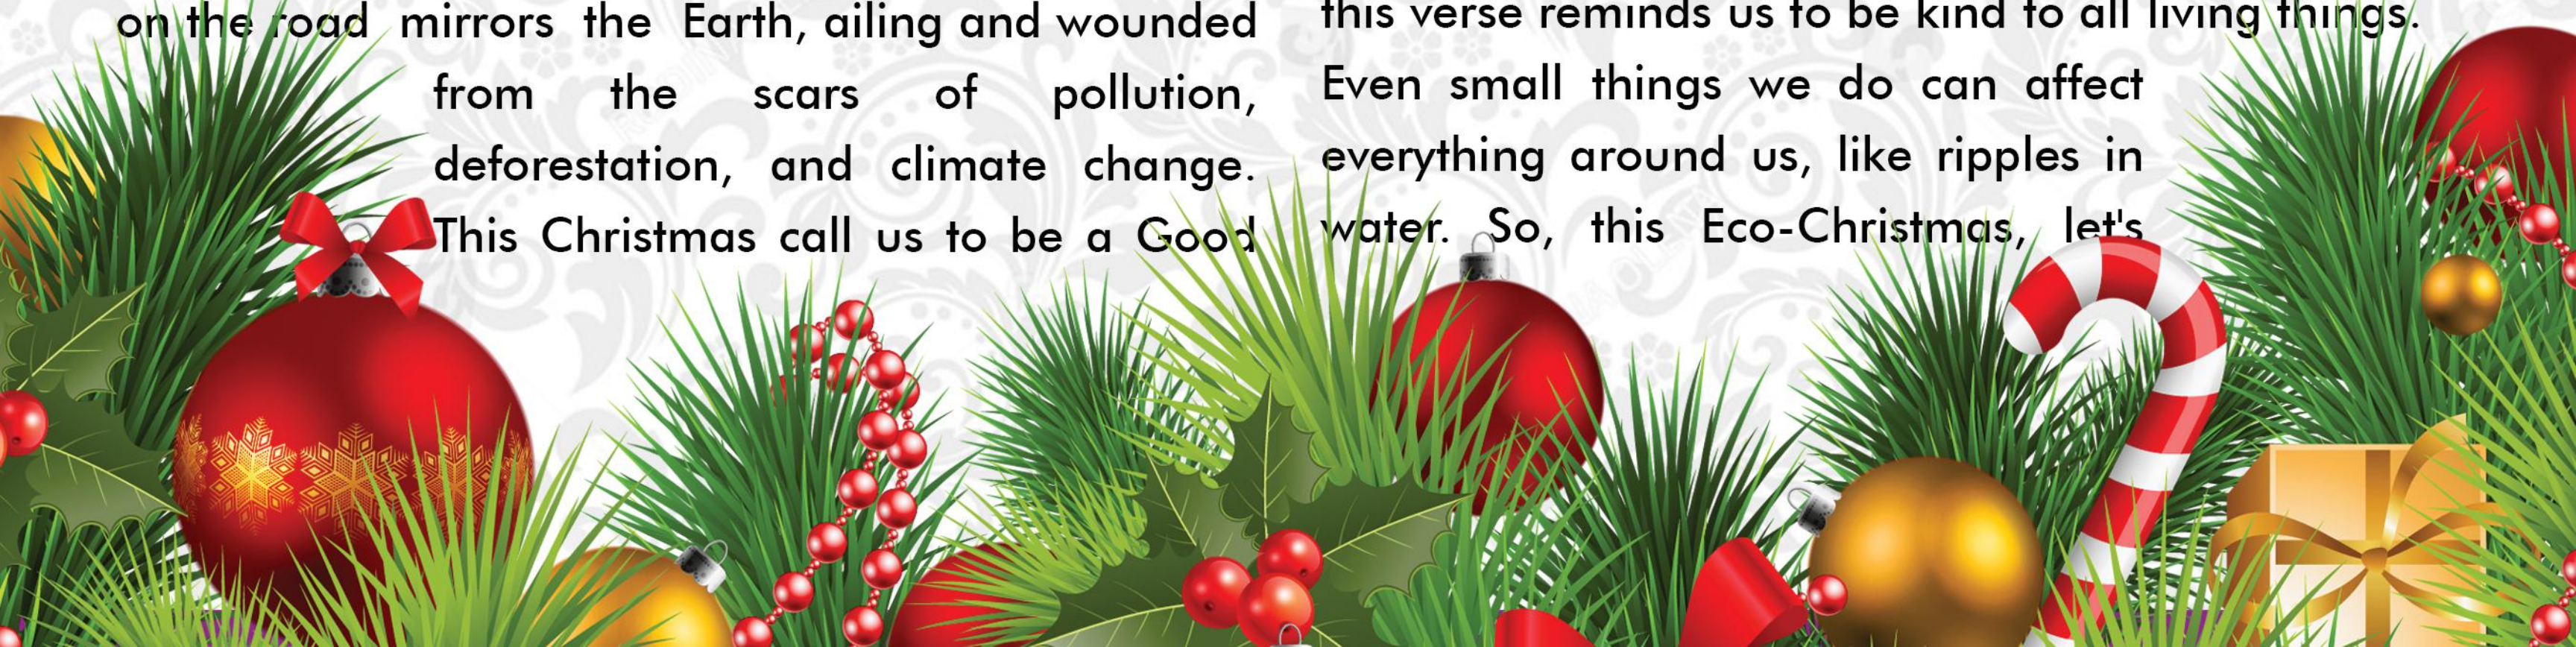

Thirdly, we see Earth as a sacred community that deserves our care and respect. It's important for us to pledge to protect the variety of living things, the environment, and the overall well-being of the planet, both for today and for the people who come after us.

Firstly, the story of Jesus' birth is very simple. He was born as the Son of God in a small stable. This plain place is made special by the wonders of nature around it. The guiding star wasn't just a sign; it was like an invitation from the cosmos. It called the shepherds and wise men to come and see the divine presence right there in nature. This story tells us that the simple stable and the star show a deep connection between God and the beauty of the natural world. It makes the birth of Jesus even more special, with a humble setting surrounded by the wonders of nature.

Secondly, the story of Good Samaritan holds a deep connection to the environment. The wounded man on the road mirrors the Earth, ailing and wounded from the scars of pollution, deforestation, and climate change. This Christmas call us to be a Good

In the spirit of an Eco-Christmas, let us rise as custodians of this sacred communion, cherishing the interconnectedness of all life. But in today's world, where we often focus on progress without thinking much about nature, a theologian Howard Thurman says "Don't worry about what the world needs. Think about what makes you feel alive, and do that. The world needs people who have come alive." So, during this festive season let us become environmentally conscious to take care of our planet for us and for our future generations.

Fourthly, let us reflect upon the Gospel of Mathew (25:40) says – "Whatever you did for one of the least of these brothers and sisters of mine, you did for me" this verse reminds us to be kind to all living things. Even small things we do can affect everything around us, like ripples in water. So, this Eco-Christmas, let's

show this kindness by treating every part of nature with respect and care, just like we're doing it for something special.

Fifthly, as we decorate our homes with Christmas stars, lights and decorations, let's not forget the precious gift we've been given – a living and breathing planet. As theologian Pierre Teilhard de Chardin puts it, "We aren't just people having a spiritual experience; we're spiritual beings having a human experience." This clearly tells us that in our spiritual journey on this Earth, we are connected with the Earth; we must take care as we take care of ourselves.

Sixthly, in our spiritual journey, we come across the teachings of theologian Gustavo Gutiérrez: "Poor people aren't poor by chance. It's not a random thing; it occurs because of the system we're a part of and responsible for." This implies that societal structures, policies, and our collective actions play a role in perpetuating poverty. Nowadays, our responsibility extends beyond helping those in need to also include taking care of the Earth, which is facing challenges like environmental issues and climate change. It's a call to contribute towards creating a better world for both humanity and the environment.

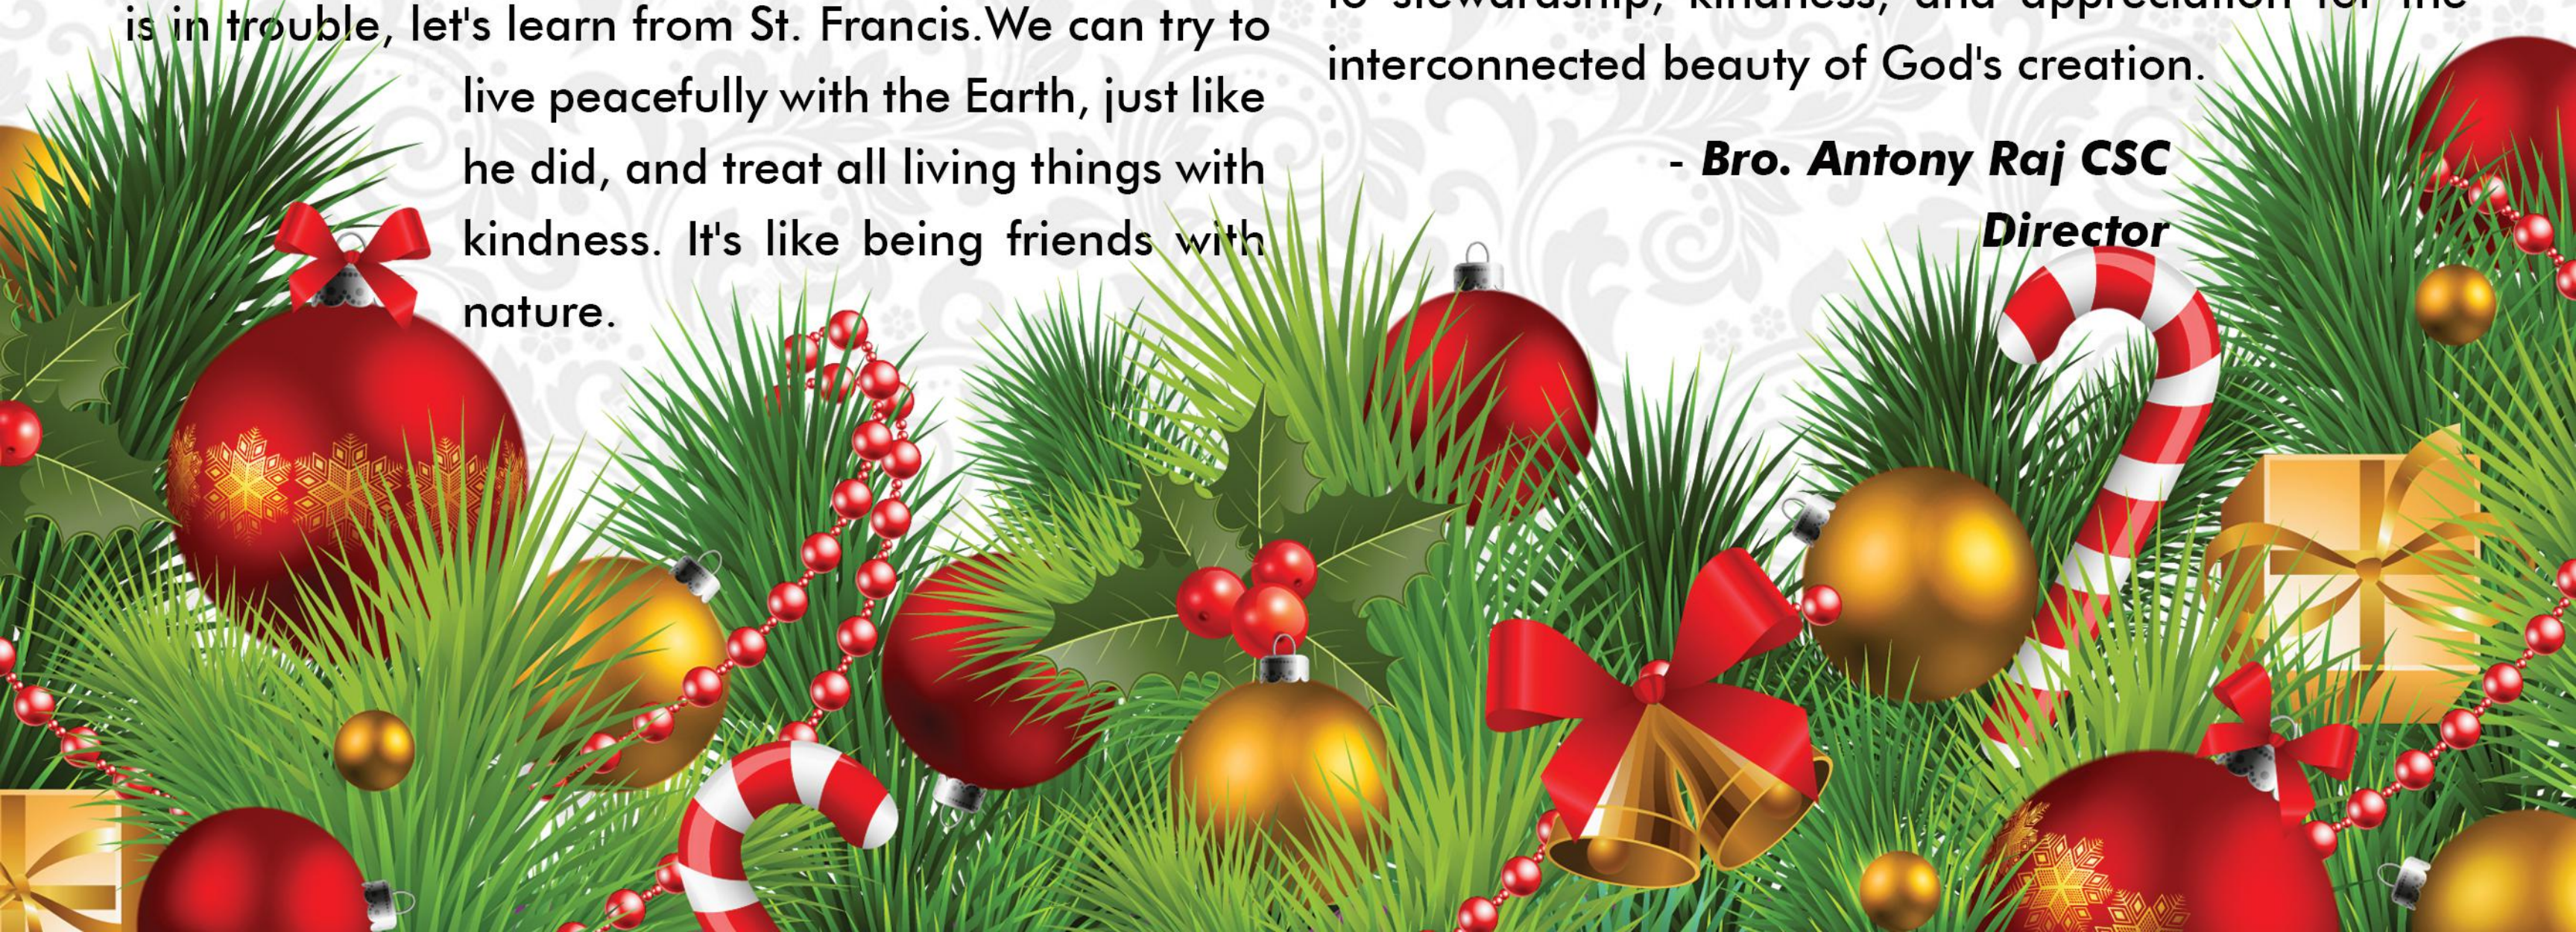

Seventhly, the story of St. Francis of Assisi offers a poignant example of ecological consciousness. Embracing a life of simplicity and harmony with nature, St. Francis saw all creatures as his brothers and sisters. In today's world, where the environment is in trouble, let's learn from St. Francis. We can try to live peacefully with the Earth, just like he did, and treat all living things with kindness. It's like being friends with nature.

Tips for Eco-Christmas

1. Use recycled or reusable materials for gift wrapping and to protect our forests.
2. Use energy-saving lights and decorations to make your home cozy while saving energy.
3. Use reusable plates and cutlery to reduce the environmental impact of our celebrations.
4. Choose simple, sustainable, locally sourced ingredients for our Christmas meals.
5. Help protect the planet by supporting environmental initiatives or charities.
6. Gifts to your friends local and handmaid gifts to support local artisans and reduce transport emissions.
7. Be conscious of your Christmas shopping, and try to buy only what you need to minimize excess waste.

During this Christmas season, let our every action serve as a sincere expression of our love for God, our fellow human beings, and the planet we call home. May the choices we make in our celebrations reflect a deep sense of gratitude for the invaluable gift of creation. As we come together to rejoice and share in the spirit of Christmas, may our reverence for the Earth shine through in the way we cherish and protect the wonders of the natural world. May our collective efforts be a testament to our commitment to stewardship, kindness, and appreciation for the interconnected beauty of God's creation.

"Christmas Celebration held on 22nd Dec 2023. Mr. Mankala S. Vaidya, the Ministry of Fisheries and Ports Inland Transport, graced the occasion as the Chief Guest."

CHRISTMAS

Christmas is a widely celebrated national holiday in numerous countries around the world. While primarily rooted in the religious observance by Christians to honor the birth of Jesus Christ, it has also become a cultural festivity embraced by many non-Christians, marking a significant part of the holiday season in the last week of the year. Universally observed on December 25th, this festival commemorates the arrival of Jesus into the world, symbolizing a ray of light and the beginning of a transformative journey. The choice of December 25th aligns with the winter solstice on the Roman calendar, traditionally considered the darkest day of the year. In this context, the birth of Jesus is seen as a beacon of hope, representing a great awakening. For traditional Christians, Christmas holds profound significance, and it is a time of love and reverence for the Savior.

Beyond its religious roots, Christmas is a time for joyous celebrations, characterized by the decoration of trees, festive meals with friends and family, and the spirit of giving. From a young age, children are instilled with values of sharing, fostering a strong sense of ethical and moral principles. The festive

season encourages everyone to set aside their usual responsibilities and come together to revel in the joy of the occasion. At its core, Christmas serves as a reminder that the divine presence always protects us, instilling a sense of enduring hope. The birth of Christ is believed to have brought an end to the sufferings of many, making Christmas a time for people to gather and find solace in the celebration. It is a season that encourages reflection on the positive aspects of life, emphasizing the message of never giving up hope.

In essence, Christmas transcends its religious origins to become a global celebration that unites people in the spirit of love, joy, and compassion, fostering a sense of community and shared values.

Feast of St. Francis Xavier

St. Francis Xavier was born on April 7, 1506, in the town of Xavier, Spain, as the third son of the president of the Council of the king of Navarre. Growing up in Xavier, he received his early education there until 1525. Subsequently, he journeyed to the University of Paris, the theological center of Europe, for further studies, where he encountered St. Ignatius of Loyola, ultimately becoming his close friend.

Inspired by St. Ignatius Loyola's words, "What shall it profit a man if he gain the whole world and lose his own soul?," St. Francis Xavier meditated on these words and decided to dedicate himself to God's mission. He joined St. Ignatius Loyola in proclaiming the kingdom of God and became one of the first seven Jesuits to take vows of poverty and chastity at Montmartre,

Paris, in 1534. Francis Xavier was ordained as a priest on June 24, 1537.

St. Francis Xavier played a pivotal role in the spread of Christianity in India. He traveled to India, where he tirelessly proclaimed the Good News and converted thousands of people. Through his efforts, many were baptized, and he taught the principles of Christianity through small catechisms in simple language.

In 1548, Francis Xavier returned to India, where more Jesuits had joined him in Goa. The College of Holy Faith, founded earlier, was turned over to the Jesuits, and Francis worked to develop it into a center for the education of native priests and catechists for the diocese of Goa, stretching from the Cape of Good Hope to China. The area he evangelized in India has remained Catholic to the present day. Remarkably, the body of St. Francis Xavier, which defied the laws of nature by not decomposing, rests in a silver casket in the Church of Bom Jesus Basilica in Goa. This miraculous preservation has continued to the present day.

St. Francis Xavier was beatified by Pope Paul V on October 25, 1619, and canonized by Pope Gregory XV on March 12, 1622. Additionally, the right hand of St. Francis Xavier, cut and sent to Rome as a relic, was considered evidence of his sanctity by the Church.

**- Mr. Xavier Lopes
JTO**

Nelson Mandela once eloquently stated, 'To deny people their human rights is to challenge their very humanity.' It is noteworthy that each individual is endowed with 30 human rights from the moment of birth. However, many might not be aware that the genesis of contemporary human rights can be traced back to the aftermath of World War II, particularly the Holocaust. In response to the atrocities witnessed during this dark period, the United Nations collaboratively crafted a groundbreaking document known as the Universal Declaration of Human Rights, intended to be applicable to every human being across the globe.

Among the myriad human rights enshrined in this document, three stand out as particularly paramount. Foremost is the right to be free from slavery, a fundamental principle asserting that no one should be coerced into actions against their will. Slavery, with its history marred by dehumanization and cruelty, was a focal point of the American Civil War, which aimed to abolish this practice. Today, thanks to the Universal Declaration of Human Rights, slavery has been outlawed in most countries, exemplifying the enduring commitment to upholding this essential human right.

The second crucial human right is the right to education. Recognizing the transformative power of

knowledge, societies worldwide acknowledge the importance of providing education as a basic right. Education serves as a catalyst for success, empowering individuals and ensuring a more prosperous future for generations to come. The belief is that a well-educated society is better equipped to navigate challenges and contribute positively to the world.

The third vital human right emphasizes ownership – the right to one's possessions. This right underscores the principle that individuals, through their hard work and endeavors, have the autonomy to claim ownership of their belongings. Whether earned through employment or other means, the right to personal property safeguards the notion that what one has acquired is exclusively theirs. This principle fosters a sense of security and autonomy, affirming an individual's right to assert ownership over their possessions.

In conclusion, the Universal Declaration of Human Rights stands as a testament to humanity's collective commitment to fostering dignity and equality.

The rights to be free from slavery, access education, and own personal property emerge as linchpins in this endeavor, reflecting a shared aspiration for a world where fundamental human rights are universally respected and protected.”

1. Annually, on December 4th, India commemorates Navy Day, acknowledging the pivotal role of the Indian Navy.
2. The Indian Navy is committed to upholding peace on the maritime front.
3. In addition to safeguarding maritime boundaries, the Navy oversees seaport visits and engages in interactions with foreign marine entities.
4. Navy Day serves as a moment to express gratitude for the invaluable contributions of the Indian Navy
5. On this significant day, the nation also honors the soldiers who made the ultimate sacrifice for the safety of the country.
6. Festivities marking Navy Day commence a week prior to the designated date.
7. The Indian Navy demonstrated remarkable prowess during the 1971 Indo-Pakistan War, notably initiating Operation Trident.
8. Noteworthy historical missions include the Indian Navy's operation to liberate Goa from Portugal in 1961.

9. The primary mandate of the Indian Navy encompasses securing the nation's maritime borders and enhancing international relations through activities like seaport visits and joint exercises.
10. Contrary to being a provocation to war, a formidable Navy is viewed as the most steadfast guarantee of peace.
11. Navy Day serves as a poignant reminder of the unsung heroes who steadfastly stand to ensure our safety.
12. The supreme authority in the Indian Navy is held by the President, a vital component of the tripartite structure of the Indian defense forces, consisting of the Army, Navy, and Air Force.

- Mohammad Ali, Electrician – I Year

The Indian farmer stands as one of the most pivotal contributors to society, playing a crucial role as the primary producer and provider of sustenance for the entire nation. Their dedication is underscored by a demanding and industrious schedule, beginning with early mornings spent in the fields for cultivation.

In earlier times, oxen were employed for tilling and plowing, but with the advent of modernization,

farmers now utilize tractors and advanced machinery to enhance efficiency.

The agricultural process involves a meticulous sequence of tasks. Farmers engage in plowing the fields, sowing seeds, and ensuring timely irrigation to foster the growth of grains. The culmination of their efforts comes with the harvest, as they meticulously reap the ripened grains. To optimize crop yield, farmers employ various techniques such

as the application of fertilizers, manures, and compost. Additionally, they grapple with the challenges posed by insects and pests, resorting to the use of insecticides and pesticides for crop protection.

In a transformative shift, contemporary farmers have evolved from being predominantly illiterate to becoming literate and technologically savvy. This transformation has empowered them with knowledge of the latest agricultural technologies and methodologies. Such awareness has not only elevated their efficiency but has also positioned them as informed decision-makers in their farming practices.

While the conditions and quality of life for larger-scale farmers may be relatively favorable, a critical concern remains for small and marginal farmers. These essential contributors to the agricultural landscape face challenges that warrant concerted efforts for improvement. Recognizing their vital role, initiatives aimed at enhancing the livelihoods and conditions of small-scale farmers are imperative.

On Farmers Day, it is paramount to celebrate the tireless efforts of these individuals who toil to feed the nation. It is an occasion to express gratitude for their resilience, adaptability, and unwavering commitment to the agricultural sector.

Beyond acknowledgment, there is a collective responsibility to work towards uplifting the standard of living for all farmers, ensuring that their contributions are duly recognized and rewarded.

NATIONAL POLLUTION CONTROL DAY 2ND DECEMBER

NATIONAL POLLUTION CONTROL DAY

Every year, on the solemn occasion of December 2nd, India observes National Pollution Control Day, a day of remembrance and reflection. The significance of this day is deeply rooted in the tragic events of December 3, 1984, known as the Bhopal gas tragedy, one of the most devastating man-made disasters in history.

The Bhopal gas tragedy unfolded as a nightmarish event, shattering the lives of thousands as a poisonous gas, methyl isocyanate, leaked from a tank within the pesticide production unit of Union Carbide India Limited. The incident had catastrophic consequences, affecting millions of lives and leaving an indelible mark on the collective consciousness of the nation.

On that fateful night, the gas silently permeated the air, escaping into the nearby residential areas within hours. The unsuspecting residents, caught in their sleep, found themselves engulfed in a toxic cloud that swiftly choked the air, leading to tragic and untimely deaths for those who could not escape in time. The repercussions of the gas leak were profound, as thousands faced severe respiratory ailments and other health complications, enduring the long-term consequences of exposure to the hazardous substance.

National Pollution Control Day serves as a poignant reminder of the importance of safeguarding the environment and underscores the catastrophic impact that unchecked pollution can have on human lives. It is a day to honor the memories of those who lost their lives in the Bhopal gas tragedy and a solemn call to action for stringent measures in pollution control.

As the nation pays homage to the victims of the Bhopal gas tragedy on this day, it also emphasizes the need for ongoing efforts in pollution control, environmental conservation, and the promotion of sustainable practices. National Pollution Control Day stands as a testament to the enduring responsibility of society to prevent such disasters and create a safer, healthier environment for future generations.
